RECYCLING INC
solutions for the next generation

Environmental Stewardship Pledge

- Honest, open, and fair in our relationships and promotion of ethical practices.
- Constant improvements in our recycling practices and programs.
- Assist residents, companies, and government institutions to recycle beyond requirements.
- Provide recycling education to all residents.
- Utilize best industry practices.
- Promote the development and adoption of reasonable environmental laws, policies, and regulations.
- Commitment to utilize recycling practices and end markets that only reuse and recycle.
- Promote reuse and remarketing options for products and materials collected, including local reuse opportunities.
- All electronics (TVs, Monitors, PCs and Laptops, Computer Peripherals, and Consumer Electronics) collected from residential and municipally sponsored sources are only processed (demanufactured and/or shredded) domestically.
- All cathode ray tubes (CRTs) are only shipped to domestic markets or EPA approved overseas end users.
- All medium and high grade circuit boards are refined and smelted in North America or industry recognized overseas end markets.
- Visible and thorough tracking of products received and processed.
- Commitment to product stewardship efforts
- All partners used to process your electronic scrap, by-products, and other materials for component and precious metal recovery through a process of disassembly, separation, and disposition into proper recycling streams comply with all EPA and governmental guidelines.
